Successful at achieving goals in both a team and self-directed environment, background in the service industry makes consumer satisfaction the ultimate objective. Always eager to take on new challenges in software development.

TECHNICAL SKILLS

Spring Boot | Java | PostgreSQL | HTML | CSS | JavaScript | Vue.js | Responsive Design | IntelliJ | Git | Unit Testing (JUnit) | E/R diagrams | Integration Testing | Unix | Visual Studio | Python | Agile Work Methodology

TECHNICAL EXPERIENCE

- **Vending Machine Application -** Created vending machine software in a command line application focused on OOP principles, that offered various products, kept an inventory, sent data to a sales log, and returned the change.
- **Money Transfer Application -** Built a client-server application similar to Venmo using Java, Postgres, and REST API. The application made transfers to fund other users, the user was able to check account balances, view transaction history, and send money. Balances and transfers were accounted for in PostgreSQL. Server-side is powered by Spring framework.

EDUCATION

Tech Elevator, Cleveland, Ohio   **September 2022 - Present**
